PLANT THIS FALL

Experience has shown there is a big advantage in fall planting of almost all varieties of hardy trees, shrubs and flowers. The earth becomes settled about the roots, new feeding rootlets are formed before severely cold weather, and they are ready to start into growth with the first coming of spring.

Planting of Peonies and Irises may begin in early September, other Hardy Flowers and Evergreens usually latter September or early October, Shade Trees and Shrubs when the leaves start dropping naturally.

No longer are the home grounds considered a mere setting for the house. The new idea is to transform the ordinary back yard, by planting, into a place of recreation and enjoyment for the whole family. It is easy with the aid of a few trees for shade, evergreens and shrubs for beauty and seclusion from the view of the passing public.

It is quite flattering to have visitors say, "What a cheerful atmosphere there is about your home." A charming home is beautiful without as well as within. It is surprising what beauty a few trees and shrubs will add to your home and how little the investment.

Hardy Vines

When planting cut the tops back severely, particularly clinging vines such as *Euonymus radicans* and Boston and English Ivy, as it is the new growth which clings. Twining vines must have a support they can twine around. If the soil near the foundation is poor, replace with good soil.

5 or more at the 10 rate, less at the each rate.

Bittersweet, American. Orange-yellow seed pods with bright red seed in autumn, clustered at the end instead of all along the branches; autumn foliage yellow; twining. 2 yr., 35c each.

Bittersweet, Oriental. A high climbing vine; orange-yellow seed pods reveal bright red seed along the branches in autumn; thrives in sun or partial shade; twining. 2 yr., 35c each.

Clematis paniculata; Japanese Clematis. Thousands of fragrant pure white four-petaled starry flowers 1-1½ in. across in September; twining by leaf stems. 2 yr., 65c each; 6.00 per 10.

Euonymus radicans colorata. Evergreen; leaves 1½ in long, in winter bronzy-red to purplish-red; clings by rootlets. 2 yr., 25c each.

Honeysuckle, Goldflame. A compact twining vine blooming almost all summer; flowers in clusters, deep rose outside, yellow inside; fragrant after nightfall. 2 yr., 50c each.

Honeysuckle, Hall Japanese. Flowers very fragrant, white becoming yellow, in June and at intervals to fall; twining; growth rapid. 2 yr. No. 1, 35c each, 3.00 per 10.

Honeysuckle, Scarlet Trumpet. Flowers trumpet-shaped, scarlet outside, buff within, 1½-2 in. long in clusters at tips of branches; twining. 2 yr. No. 1, 35c each, 3.00 for 10.

Wisteria, Chinese Blue. Clusters of violet-blue pea-shaped flowers, longer than those of the American and not quite so thick on the cluster; twining. 2 yr. No. 1, 50c each.

Wisteria, Chinese White. 2 yr. No. 1, 50c each.

Scarlet Trumpet or Coral Honeysuckle is a favorite of the humming-birds.

Water Lilies All Summer

To have hardy Water Lilies blooming all summer, beginning in May, you need only a pool, 8-12 in. of soil, a foot of water and sun. When grown in boxes they should be about 8 in. deep and 14 to 16 in. square. Prices 40c up. Write for list.

Hardy Evergreens

Grown with plenty of room, our Evergreens are compact, well developed trees of their size and variety. They have been transplanted and root pruned and are well rooted. They are not grown rapidly and soft but are firm and easily transplanted. They are liberally graded. With the exception of the "mail size" they will be dug with a ball of earth wrapped in burlap, termed "balled and burlapped" or B. & B.

MAIL SIZES, POSTPAID

Our mail size are transplanted, sturdy little trees, not balled and burlapped as these sizes do not require it. The value of trees cannot be shown in a catalog. A small size evergreen may be a spindling little tree that requires petting, or a well grown small tree that with reasonable care gives good results. We intend to give you your money's worth. Plant these mail sizes firmly, water them as the season requires and they should give you good results. They are not yet old enough and large enough to give the immediate effect of balled and burlapped sizes. Give them time to grow into larger sizes and we think they will please you. B. & B. trees cannot be sent by mail.

Peonies Are Easily Grown

Hardy as the oak, Peonies are so easily grown that little need be said. Often, in neglected gardens, one sees large clumps that have flourished and bloomed for years. Yet they amply repay all attention given them. They thrive in almost any good, well drained soil, are best in full sun but succeed with shade part of the day. Plant 3 feet apart. The early varieties usually begin blooming here about May 5 to 8.

The name and date in parenthesis is the originator or introducer and date of introduction. The guards are the wide outer petals. The type of flower is designated as follows:

Crown. Wide center or crown petals with narrower, shorter petals forming a collar or ring between them and the guards.

Bomb. Center petals of uniform width but narrower than the guards and forming a globe within the guards.

Semi-rose. Flowers that would be classed as rose but for an occasional pollen bearing stamen.

Rose. Perfectly full, all petals wide, no stamens. The center petals may not be as wide as the guards but if quite distinct it would be a bomb.

PEONY SIZES AND PRICES

Prices quoted are for good strong divisions of 3 to 5 eyes from blooming plants. We consider them fully equal to one-year plants usually sent out. If you want something larger order 5 to 8 eyes at fifty per cent advance or 8 to 10 eyes at double the printed price. Three of a kind at dozen rates.

PEONIES BY PARCEL POST

If wanted by parcel post allow 8c for the first plant and 2c for each additional plant if within 150 miles of Sarcoxie. For the balance of Missouri and adjoining states 10c for the first plant and 3c for each additional plant. For more distant states 15c for the first plant and 8c for each additional plant. Any balance will be refunded.

PENNANT MIXED PEONIES

If you want something good at a moderate price and are not particular what varieties and colors, just so they are nice, order Pennant Mixed. This is not a cheap lot of undesirable varieties, but a really good mixture of named Peonies, the leading commercial varieties predominating. Do not ask for certain colors of these as they are grown mixed. 25c each, 2.00 per doz.; 50 or more at 16c each.

Fruit Trees and Small Fruits

There is an extreme shortage of fruit trees this season. At the time this catalog is printed we cannot tell whether we will be able to supply any more than called for by orders now on hand. If more are available in the spring they will be quoted in the spring catalog.

We will have a limited supply of Grape Vines, Raspberries, Blackberries, Strawberries and some other small fruits for spring shipment. They will also be quoted in the spring catalog.

Strawberries

In Southern Missouri and farther north strawberries usually give better results when planted in the spring. They will be quoted in the spring catalog, or by letter on request.

Asparagus

Paradise. Large; productive; resistant to rust; an excellent variety. 2 yr., 45c per doz.; 85c per 25; 3.00 per 100.

Rhubarb or Pie Plant

Large, tender, delicately flavored stalks; productive. 20c each; 3 for 50c; 1.50 per doz.

Postmaster: Notify sender (Form 3547) if addressee has moved; give new address. Return if cannot be delivered. Postage for all guaranteed. Catalog 3rd class. May be opened for postal inspection.
